DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 4, 5, 6, 9, and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Shibasaki (6556439). With respect to claims 1, 4, 5, 6, 9, and 10, Shibasaki teaches an electronic device (1) comprising a display unit (3), a host (4) comprising a module structure having a first substrate (8), at least one process unit (CPU 9), at least one heat dissipating device (26), a second substrate (37) as claimed, see for example figures 1-3. As to the connecting portions, applicant is directed to the enclosed copy of figure 3.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 3, 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shibasaki (6556439). With respect to claims 2, 3, 7 and 8, Shibasaki teaches the

invention as set forth by claims 1 and 10, see the above rejection thereof. However, Shibasaki is silent on the material and structure used to produce the first and second substrates. It would have been obvious to one of ordinary skill in the art at the time the invention was made for the first and second substrates of Shibasaki to be made from the same material as well as the structure being of a "multi-layer" type as it is notoriously well known in the art to do so, as evident by applicant's silence on the matter.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please note the teachings of Kitahara et al. (6549404), Ahn (6141214), Yeh (6151214), Lui et al. (6122169), Wagner et al. (6157539), Lin (6252768), Yang (6717815), and Wang (6373700).
